EXAMINER

SADULA, JENNIFER R

ART UNIT PAPER NUMBER

1756

DATE MAILED: 07/03/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/009,613

Applicant(s)

UENO ET AL.

Examiner

Jennifer R. Sadula

Art Unit

1756

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/14/20001 and 2/19/2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 4. 6) ☐ Other: _____

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 2/19/02 has been considered by the examiner. However, the examiner wishes to note that these references merely submitted without an English translation of the abstract have only been considered on the merits of that which was in English and no more.

Claim Objections

Claims 1-5 are objected to because of the following informalities: in claim 1, the polyester resin comprises derivatives in ppm in terms of "an alkali metal of an alkali metal compound" yet no such compound exists as the composition is claimed. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "the alkali metal salt" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al, U.S. Patent No. 5,124,477 (“Suzuki”).

Suzuki teaches a process for preparing PHBA (para-hydroxybenzoic acid) for use in liquid crystal polyester materials (LCP) by reacting an alkali salt of phenol with carbon dioxide via the Kolbe-Schmitt process wherein salicylic acid is generated. Via the teaching of Suzuki, potassium salts are preferred. Thus potassium phenolate and potassium salicylates are utilized (3:63-4:9). The amount of the compound of formula I and/or formula II that is contained in the reaction system is specified in column 6, lines 26-37 wherein the amounts are specified in terms of the salts utilized and fall within the specified ranges of applicants claim 1.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Samuels et al, U.S. Patent No. 5,977,405 (“Samuels”).

Samuels teaches preparation of aromatic hydroxycarboxylic acids and dialkali metal salts wherein p-hydroxybenzoic acid (a salicylic acid PHBA) is utilized as a monomer in making polyesters. The alkali metal aryloxides are usually prepared via the reaction of an aryl hydroxy compound such as phenol and an alkali metal containing base, such as sodium or potassium

Art Unit: 1756

hydroxide (1:15-28). Again, the Kolbe-Schmitt process is utilized. Table 1 shows the usage of HIP and Salicylic acid in relation to the salts utilized.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanimoto et al, U.S. Patent No. 4,731,475 ("Tanimoto").

Tanimoto teaches a method of making PHBA (para-hydroxybenzoic acid) by preparing p-disodium hydroxybenzoate to a desodium process with a secondary production of salicylic acid (1:10-24). Powdered sodium carbonate may be used within the range of from 5 to 50% by weight in terms of phenol in a solution (2:3-14). P-disodium hydroxybenzoate and sodium chloride in the presence of a transition metal powder are utilized as specified in the examples and abstract. Via the teaching of Tanimoto, sodium salts are preferred.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki or Samuels as applied above, each in view of Furuta et al., U.S. Patent No 5,891,532, ("Furuta").

Suzuki teaches a process for preparing PHBA (para-hydroxybenzoic acid) for use in liquid crystal polyester materials (LCP) by reacting an alkali salt of phenol with carbon dioxide

Art Unit: 1756

via the Kolbe-Schmitt process wherein salicylic acid is generated. Samuels teaches preparation of aromatic hydroxycarboxylic acids and dialkali metal salts wherein p-hydroxybenzoic acid (a salicylic acid PHBA) is utilized as a monomer in making polyesters. The alkali metal aryloxides are usually prepared via the reaction of an aryl hydroxy compound such as phenol and an alkali metal containing base, such as sodium or potassium hydroxide (1:15-28). Again, the Kolbe-Schmitt process is utilized.

Neither Samuels nor Suzuki teaches the LCP resin the materials made are utilized in, only to say that each is for use in LCP resins.

Furuta teaches a LCP as specified in claim 5 wherein recurring units I, II and III are shown in columns 4-7 wherein it is taught that preferred combinations include polyesters from groups I and II which are as shown by applicants.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the polyesters of Samuels or Suzuki and utilize them in the resin co-polyesters of Furuta as both Suzuki and Samuels teach the materials made by the Kolbe-Schmitt process to be for use in any LCP resin material.

Conclusion

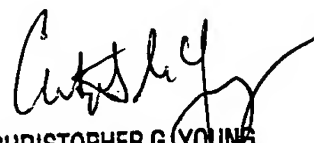

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer R. Sadula whose telephone number is 703.305.4835. The examiner can normally be reached on Monday through Friday, 10am-6pm.

Art Unit: 1756

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on 703.308.2464. The fax phone numbers for the organization where this application or proceeding is assigned are 703.872.9310 for regular communications and 703.872.9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.308.0661.
